

**we are
taking
care
of your
WordPress
website**

We know how technical jargon can be boring for our clients when it comes to your Website's updates, backups, performances, security issues and SEO & Google Analytics reports.

That's why we're offering an excellent WordPress Website Maintenance service that will provide monthly reports that cover all the topics you need.

LUCIDICA

WordPress Maintenance is important for the overall “health” and security of your WordPress site. At the basic level, WordPress Maintenance involves three types of updates:

- Updates to WordPress core
- Updates to plugins
- Updates to themes

Updates are pushed out by the WordPress core team and theme and plugin authors to add new features, fix bugs and patch security holes. **By updating your WordPress sites to the latest versions of WordPress core, plugins and themes, you ensure you’re running the safest, most stable and feature-rich versions of the software.**
